Pricing

Prices stated in specific written quotations are firm for thirty days from the date given, and are otherwise subject to change without prior notice. Pricing terms stated on written agreements are governed by such agreements.

Shipments

F.O.B. Integra point of shipment within the continental United States. Shipping costs (including freight and insurance), shall be prepaid by Integra and invoiced to customers.

Ordering Procedure

A written purchase order on customer's form may be requested for purchases of Integra products.

Acceptance of Orders

Orders are accepted upon approval by Integra in Plainsboro, New Jersey.

Bonding Service

Upon customer request, screws can be bonded in certain instruments. For details about our bonding service, please contact your Integra representative or the customer service department.

Return Policy

- Authorization, from customer service, must be obtained prior to returning product.
- Sterile product must be returned in unopened, undamaged cartons, packed to prevent damage.
- Non-sterile product must be returned in unused saleable

condition in original package.

- Custom or special order products will not be accepted for credit.
- Credit will be issued for goods returned prior to ninety days from ship date with a 20% restocking charge. This assumes that the product returned is not damaged and can be verified to have not been used or opened.

Integra Standard Warranty

INTEGRA LIFESCIENCES CORPORATION ("INTEGRA") warrants to the original purchaser only that each new INTEGRA product is free from manufacturing defects in material and workmanship under normal use and service for a period of one (1) year (except as otherwise expressly provided as to accessory items) from the date of delivery by INTEGRA to the first purchaser, but in no event beyond the expiration date stated on any product labeling.

- Surgical instruments are guaranteed to be free from defects in material and workmanship when maintained and cleaned properly and used normally for their intended purpose.
- Any covered product that is placed by INTEGRA under a lease, rental or installment purchase agreement and that requires repair service during the term of such placement agreement shall be repaired in accordance with the terms of such agreement.

If any covered defect occurs during the warranty period or term of such placement agreement, the purchaser should communicate directly with INTEGRA's home office. If purchaser seeks to invoke the terms of this warranty, the product must be returned to INTEGRA at its home office. The defective product should be returned promptly, properly packaged and postage prepaid. Loss or damage in return shipment to INTEGRA shall be at CUSTOMER's risk. INTEGRA's sole responsibility under this warranty shall be repair or replacement, at INTEGRA's sole discretion at INTEGRA's expense, subject to the terms of this warranty and applicable agreements.

IN NO EVENT SHALL INTEGRA BE LIABLE FOR ANY INCIDENTAL, INDIRECT, CONSEQUENTIAL OR PUNITIVE DAMAGES IN CONNECTION WITH THE ACQUISITION OR USE OF ANY INTEGRA PRODUCT. Further, this warranty shall not apply to, and INTEGRA shall not be responsible for, any loss arising in connection with the purchase or use of any INTEGRA product that has been repaired by anyone other than an authorized INTEGRA service representative or altered in any way so as, in INTEGRA's judgment, to affect its stability or reliability, or which has been subject to misuse, negligence or accident, or which has been used otherwise than in accordance with the instructions furnished by INTEGRA. THIS LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, AND OF ALL OTHER OBLIGATIONS OR LIABILITIES ON INTEGRA'S PART, AND INTEGRA NEITHER ASSUMES NOR AUTHORIZES ANY REPRESENTATIVE OR OTHER PERSON TO ASSUME FOR IT ANY OTHER LIABILITY IN CONNECTION WITH INTEGRA'S PRODUCTS.

INTEGRA DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR APPLICATION OR WARRANTY OF QUALITY AS WELL AS ANY EXPRESS OR IMPLIED WARRANTY TO PATIENTS. No warranty or guarantee may be created by any act or statement nor may this Standard Warranty be modified in any way, except as a result of a writing signed by an officer of INTEGRA. These limitations on the creation or modification of this warranty may not be waived or modified orally or by any conduct.

Product Description

Integra's surgical instruments are designed to perform a specific function, such as cutting, grasping, clamping, dissecting, probing, retracting, draining, aspirating, suturing, or ligating. The use of an instrument for a task other than that for which it is intended, as well as improper, ineffective and insufficient maintenance can greatly reduce the life of an instrument and will invalidate the instrument's warranty.

How Supplied

Integra's instruments are supplied non-sterile and must be cleaned, lubricated and sterilized prior to use according to hospital protocol and the procedures outlined in this document. Failure to follow these procedures will invalidate the instrument's warranty and can cause the instrument to fail.

Care and Handling

After each use of an instrument, these critical processing steps must be followed:

1. Conduct a visual and mechanical inspection of each instrument. The importance of inspecting each instrument cannot be overemphasized.
2. Separate broken or malfunctioning instruments from the set and send back to Integra LifeSciences for repair or replacement after receiving return authorization.
3. Hand wash delicate instruments in a neutral pH solution (7.0 to 8.5pH).
4. Ultrasonically clean all instruments with moving parts. Check screws on instruments after cleaning, especially ultrasonic cleaning, since the vibration of ultrasonic cleaning can cause screws to loosen or fall out.
5. Lubricate all instruments in a water soluble, antimicrobial lubricant after every ultrasonic cleaning process as ultrasonic cleaning removes all lubrication from instruments.
6. Sterilize instruments prior to use. Consult product labeling for methods of sterilization.

Inspection of All Instruments

Before Use. Each instrument must be inspected after cleaning and before use to ensure that the instrument is in proper operating condition. There should be no signs of rust or corrosion. **Only fully cleaned, properly functioning instruments should be packaged for reuse.** After Use. Each instrument must be inspected immediately after use to ensure that the instrument is in proper operating condition.

Inspection of Instruments with Screws

In addition to the inspection guidelines set forth above, each instrument with a screw must be inspected before and immediately after use to ensure that the screws do not move when operating the instrument. Screws can loosen and back out of an instrument as a result of normal operation as well as during ultrasonic cleaning, because the vibration of ultrasonic cleaning can cause screws to loosen or fall out. After cleaning, check to ensure that the screws are secure (not moving when operating the instrument), that the action is smooth (and not stiff, sticking or jerking) and that the cutting edges are sharp (able to cut through an index card cleanly). There should be no signs of rust or corrosion. Only fully cleaned, properly functioning instruments should be packaged for reuse. It is unsafe to use instruments with loose or missing screws.

Troubleshooting

Following are possible solutions to some common problems you may encounter with stainless steel surgical instruments:

Corrosion (rust)

Cause: Dried blood in box locks, serrations and ratchets, can look like rust after it has been baked on and may cause cracked box locks.

Solution: Clean instruments more thoroughly after each use.

Cause: Excessive moisture left on the surface, in box locks or crevices in sterile wrapped packs. Also, excessive moisture left in the autoclave during and at the completion of the cycle.

Solution: Preheat the autoclave. Don't rush the drying time - just open the door slightly. Properly maintain autoclave valves, as a leaking valve can cause moisture or permit the return of corrosive matter to the autoclave.

Pitting

Cause: Exposure to saline solutions, blood, potassium chloride and a number of other compounds.

Solution: Rinse with fresh running water as soon as possible after exposure to corrosive elements, and then clean in the usual manner.

Cause: Detergent residue, especially if not thoroughly rinsed from the instrument, contains chloride or has an acid base. The chloride in the cleaner unites with the steam in the autoclave to form hydrochloric acid.

Solution: Avoid detergents with chloride bases.

Light Colored Spotting

Cause: Condensation from the autoclave.

Solution: Carefully follow the autoclave manufacturer's recommendation, checking for loose fitting gaskets in the autoclave, and/or verifying proper weight limitations for each tray within the autoclave cycle.

Staining

Cause: Purple or purple-black staining is the result of electrolytic action occurring when amine chemicals used in steam lines are deposited on the instrument.

Solution: Use of distilled or demineralized water in the autoclave should prevent this problem.

Light Brown Surface Coating

Cause: A film-like coating can be deposited on the instrument through the sterilization process. This can be caused by high iron content in steam from the hospital water supply system used in the autoclave.

Solution: Repeat the cleaning process either by machine or manually to remove the coating. Your autoclave specialist should be consulted in this case

As a general rule, it is advisable to use only demineralized water for the final rinse.

Repairs and Maintenance

Should your instruments require repair or maintenance, contact Integra for return authorization and return address. Instruments returned to Integra for repair must have a statement testifying that each instrument has been thoroughly cleaned and sterilized. Failure to supply evidence of cleaning and disinfection will result in a cleaning charge and delayed processing of your instrument repair. Products repaired by Integra are guaranteed for 90 days to be free of defects in workmanship and parts when used normally for their intended surgical purpose. Any workmanship or parts proving to be defective will be replaced or repaired, at Integra's discretion, at no charge to the customer.
