Pricing:

Prices stated in specific written quotations are firm for thirty days from the date given, and are otherwise subject to change without prior notice. Pricing terms stated on written agreements are governed by such agreements.

Minimum Order Requirements:

Minimum order requirement is €250 (a €20 minimum order requirement charge will be added to any order under €250).

Ordering Procedure:

A written purchase order on the customer's form may be requested for purchases of Integra LifeSciences products.

Acceptance of Orders:

Orders are accepted upon approval by Integra Customer Service.

Return Policy:

- Authorization from Customer Service must be obtained prior to returning product.
- Sterile product must be returned in unopened, undamaged cartons, packed to prevent damage.
- Non-sterile product must be returned in unused saleable condition in original package.
- Custom or special order products will not be accepted for credit.
- Credit will be issued for goods returned prior to ninety days from ship date with a 20% restocking charge. This assumes that the product returned is not damaged and can be verified to have not been used or opened.

Integra Limited Warranty – Integra products

INTEGRA LIFESCIENCES CORPORATION and its wholly owned subsidiaries ("INTEGRA") warrant to INTEGRA authorized distributors and the original purchaser only that each new INTEGRA product is free from manufacturing defects in material and workmanship under normal use and service for a period of one (1) years (except as otherwise expressly provided as to accessory items) from the date of delivery by INTEGRA (or its authorized distributor) to the original purchaser, but in no event beyond the expiration date stated on any product labeling. For purposes of products sold by INTEGRA through an authorized distributor of INTEGRA, "original purchaser" shall include the purchaser of INTEGRA products to whom the distributor first sells the product.

- Surgical instruments are guaranteed to be free from defects in material and workmanship when maintained and cleaned properly and used normally for their intended purpose.
- Any covered product that is placed by INTEGRA under a lease, rental or installment purchase agreement and that requires repair service during the term of such placement agreement shall be repaired in accordance with the terms of such agreement. If any covered defect occurs during the warranty period or term of such placement agreement, the purchaser or distributor should communicate directly with INTEGRA. If purchaser or distributor seeks to invoke the terms of this warranty, the product must be returned to INTEGRA. The defective product should be returned promptly, properly packaged and postage prepaid. Loss or damage in return shipment to INTEGRA shall be at sender's risk. INTEGRA's sole responsibility under this warranty shall be repair or replacement, at INTEGRA's sole discretion at INTEGRA's expense, subject to the terms of this warranty and applicable agreements.

IN NO EVENT SHALL INTEGRA BE LIABLE FOR ANY INCIDENTAL, INDIRECT, CONSEQUENTIAL OR PUNITIVE DAMAGES IN CONNECTION WITH THE ACQUISITION OR USE OF ANY INTEGRA PRODUCT. Further, this warranty shall not apply to, and INTEGRA shall not be responsible for, any loss arising in connection with the purchase or use of any INTEGRA product that has been repaired by anyone other than an authorized INTEGRA service representative or altered in any way so as, in INTEGRA's judgment, to affect its stability or reliability, or which has been subject to misuse, negligence or accident, or which has been used otherwise than in accordance with the instructions furnished by INTEGRA.

THIS INTEGRA LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, AND OF ALL OTHER OBLIGATIONS OR LIABILITIES ON INTEGRA'S PART OR THE PART OF ITS DISTRIBUTORS, AND INTEGRA NEITHER ASSUMES NOR AUTHORIZES ANY REPRESENTATIVE OR OTHER PERSON TO ASSUME FOR IT ANY OTHER LIABILITY IN CONNECTION WITH INTEGRA'S PRODUCTS.

INTEGRA DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR APPLICATION OR WARRANTY OF QUALITY AS WELL AS ANY EXPRESS OR IMPLIED WARRANTY TO PATIENTS. No warranty or guarantee may be created by any act or statement nor may this Standard Warranty be modified in any way, except as a result of a writing signed by an officer of INTEGRA. These limitations on the creation or modification of this warranty may not be waived or modified orally or by any conduct.

IN NO EVENT SHALL INTEGRA AUTHORIZED DISTRIBUTORS BE LIABLE TOWARDS THE ORIGINAL PURCHASER FOR ANY INCIDENTAL, INDIRECT, CONSEQUENTIAL OR PUNITIVE DAMAGES IN CONNECTION WITH THE ACQUISITION OR USE OF ANY INTEGRA PRODUCT. Further, this warranty shall not apply to, and INTEGRA authorized distributors shall not be responsible towards the original purchaser for, any loss, arising in connection with the purchase or use of any INTEGRA product that has been repaired by anyone other than an authorized INTEGRA service representative or altered in any way so as to affect its stability or reliability, or which has been subject to misuse, negligence or accident, or which has been used otherwise than in accordance with the instructions furnished by INTEGRA. THIS INTEGRA DISTRIBUTOR LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES TOWARDS THE ORIGINAL PURCHASER, EXPRESS OR IMPLIED, AND OF ALL OTHER OBLIGATIONS OR LIABILITIES TOWARDS THE ORIGINAL PURCHASER ON INTEGRA AUTHORIZED DISTRIBUTOR'S PART.

Pyrocarbon PIP Implant

The Pyrocarbon PIP is a 2-component total joint replacement made from biocompatible Pyrocarbon material.

PIP is indicated for use in arthroplasty of the proximal interphalangeal (PIP) joint when the patient:

- Has soft tissue and bone that can provide adequate stabilization and fixation under high-demand loading conditions after reconstruction;
- Needs a revision of a failed PIP prosthesis, or has pain, limited motion, or joint subluxation/dislocation secondary to damage or destruction of the articular cartilage.

Pyrocarbon MCP Implant

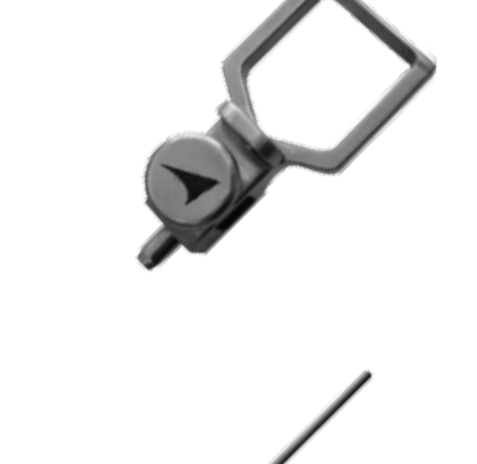

The MCP set contains:

- 2 Component anatomical total joint replacement made out of biocompatible Pyrocarbon.
- MCP Silicon spacer implant silicone spacer.

MCP is indicated for use as a total joint replacement of index, long, ring, and small finger metacarpophalangeal (MCP) joints that exhibit symptoms of pain, limited motion, or inadequate bony alignment (i.e., subluxation/dislocation) secondary to articular destruction or degenerative disease related to rheumatoid arthritis, systemic lupus erythematosus, osteoarthritis, or post-traumatic arthritis where soft tissue reconstruction can provide adequate stabilization.

Silicon MCP Implant

Silicone MCP Finger Joint Prosthesis is intended for cementless replacement of the metacarpophalangeal (MCP) joint, where disabled by rheumatoid, degenerative, or traumatic arthritis.

MCP System is used for proper placement. See MCP System for instrument set.

- Instrumentation for implant placement is the same set as for the Pyrocarbon MCP implant.
- Surgical technique and sequence is identical to MCP pyrocarbon implant (NB Possible soft tissue repair).

PCS Spacer*

PyroSphere is intended to replace the joint between the first metacarpal and the trapezium in cases of rheumatoid arthritis, traumatic arthritis, osteoarthritis or post-fracture deformation or bone loss which present as either a painful, unstable thumb, or a thumb with limited range of motion.

PyroSphere is also intended for use in the fourth/fifth tarsometatarsal (TMT) joint involvement where degenerative or post-traumatic arthritis presents:

- decreased motion.
- arthritic changes and/or subluxation.
- unstable, stiff, or painful joints.
- degenerative joint disease of the midfoot.
- associated with gout or pseudogout.

Integra® Upper Extremity Fracture Repair

Safeguard™ Mini-Open Carpal Tunnel Release system

Indications for use:

- The Safeguard™ System is used for the treatment of carpal tunnel syndrome in patients who fail to respond to conservative treatment.

Kompressor™ Compression Screw system

The use of the Kompressor compression screw is generally indicated for the reduction and fixation of fractures appropriate for the size of the device. It is indicated for use in the internal fixation of fractures, fusion, and revision. It is also indicated for reconstructive procedures where reduction and fixation of bone fragments is required (e.g. osteotomies).

Hand Fractures and Deformity Repair Set

It is a set to be used for fractures.

Only one instrumentation module in order to set up 4 screws:

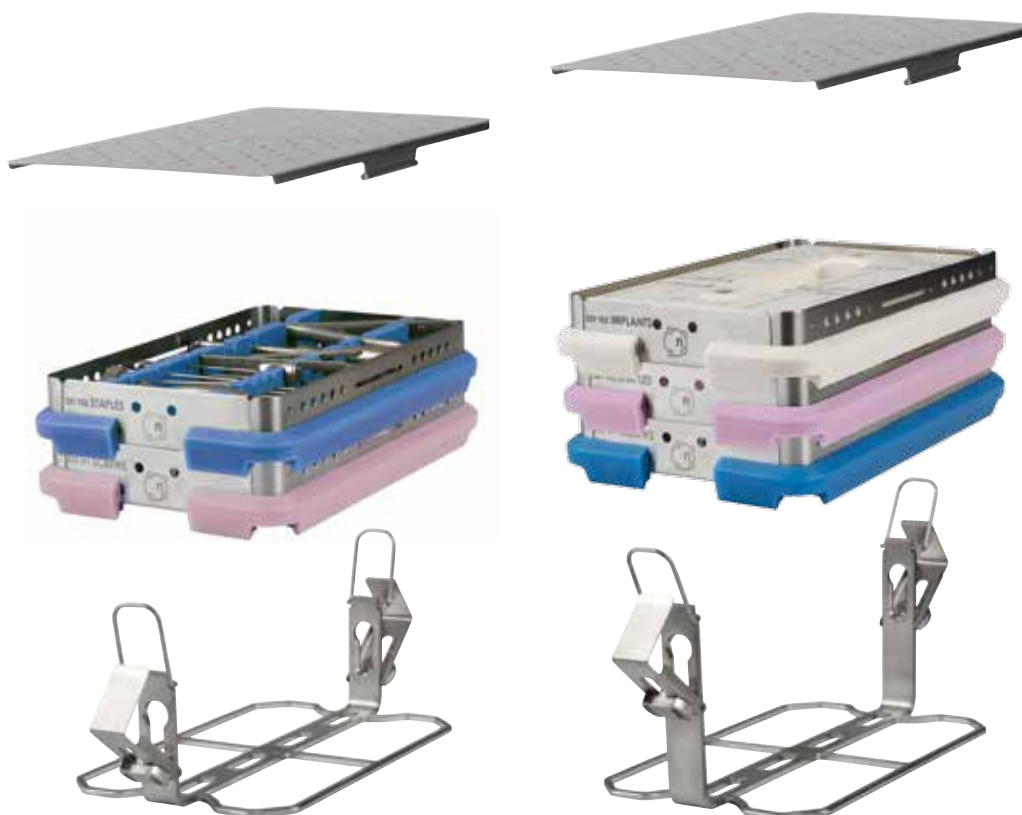

- Bold® Compression Screw:
 - > 2.5 mm
 - > 3.0 mm
 - > 3.7 mm
- Qwix® Fixation Screw:
 - > 3.0 mm

And two associated optional modules :

- Implant module: for non sterile screws.
- Generic module: for other personal instrumentation and support for 2 or 3 floors for the chosen modules.

QWIX® Fixation Screw, dia. 3.0 mm (for associated instrumentation, see p. 8)

For fixation of bone fractures or for bone reconstruction:

- Self-drilling and self-tapping.
- Totally intra-osseous fixation.
- K-Wire guided drilling and insertion.
- Material: Titanium alloy TA6V.

Bold® Compression Screw dia. 2.5 mm / 3.0 mm / 3.7 mm (for associated instrumentation, see p. 8)

For fixation of bone fractures or for bone reconstruction:

- Totally intra-osseous implants.
- Large range of sizes:
 - > 10 to 30 mm for Bold® 2.5 by 2 mm increment.
 - > 10 to 34 mm for Bold® 3.0 by 2 mm increment.
 - > 14 to 34 mm for Bold® 3.7 by 2 mm increment.
- K-Wire guided drilling and insertion.
- Self tapping.
- True & controlled compression.
- Dual threads.
- Material: Titanium alloy TA6V.

Integra®
Upper Extremity
Wrist Arthritis
& Deformity Repair

Universal2™ Total Wrist Implant System

The Universal2™ Total Wrist System is indicated for use in patients suffering pain and/or loss of function due to:

- Traumatic Arthritis
- Osteoarthritis
- Rheumatoid Arthritis
- SLAC Wrist

The Universal2™ Total Wrist may also be indicated for use in the revision of a failed implant, in younger patients with articular joint disease, or in difficult situations where clinical experience indicates that other reconstructive efforts are likely to achieve unsatisfactory results. Use should be limited to those conditions where preoperative exam indicates sufficient bone stock for the support of the implants.

Integra® Total Wrist Fusion System ITWFS

The Integra® Total Wrist Fusion System is indicated for use in patients with:

- Post-traumatic arthritis of the joints of the wrist.
- Rheumatoid wrist deformities requiring restoration.
- Complex carpal instability.
- Post-septic arthritis of the wrist.
- Severe unremitting wrist pain related to motion.
- Brachial plexus nerve palsies.
- Tumor resection.
- Spastic deformities.
- Pain and/or loss of function due to osteoarthritis.
- Revision of failed partial wrist fusions.

Spider™ – Mini-Spider™ / Limited Wrist Fusion System

SPIDER / MINI-SPIDER is indicated for use in patients suffering pain and/or loss of function due to:

- Osteoarthritis.
- Post-traumatic arthritis.
- Fractures.
- Revision of failed partial wrist fusions.
- Carpal Instability.
- Rheumatoid arthritis.

PyroCarbon Lunate Implant

PyroCarbon Lunate is intended for replacement of the lunate bone in the proximal carpal row of the wrist in the presence of:

- Avascular necrosis (Kienboch's disease)
- Localized osteoarthritic changes
- Long-standing dislocations

The implant is available in 5 sizes for use in left or right applications.

First Choice™ System (DRUJ)

The First Choice™ system (DRUJ) contains a Total Ulna Head replacement as well a Partial Ulna head replacement in one system.

The instrumentation set provides the same instruments for both implant options, but there are additional instruments present that are needed for the Partial Ulna head replacement.

Within one set, 2 trays are available:

- Bottom tray : general instruments (reamers, awl etc...).
- Top tray – Trails partial Ulna head replacement and the dedicated cutting guide that is needed for the partial Ulna Head replacement surgical technique.

The same instrument set is needed to be used with both replacements.

There is a range sizes of Partial Distal Ulnar Radial head replacement available. The partial ulna head replacement is a monoblock implant

- 3 Stem sizes: 4.5 mm, 4.5 mm and 5.5 mm
- All these stem size are available with the following head sizes: -14.5, 16.0- 17.5 – 19.0

The Ascension First Choice™ Partial Ulnar Head Replacement

The Ascension® First Choice® is intended for replacement of the distal radioulnar joint:

Replacement of the distal ulnar head for rheumatoid, degenerative, or post-traumatic arthritis presenting the following:

- Pain and weakness of the wrist joint not improved by conservative treatment
- Instability of the ulnar head with x-ray evidence of dorsal subluxation and erosive changes
- Failed ulnar head resection

Wifix® Plate – Surfix® Volar Plate for Distal Radius

This plate is indicated for:

Traumatology:

- Articular or distal complex fractures of the radius.
- Anterior or posterior comminuted fractures with bone defect.

Reconstructive surgery:

- Shortening osteotomy for Kienbock's disease.
- Correction of distal radius malunion particularly anterior additional bone graft.
- Lunar radio-scapho arthrodesis.
- Radio-carpal arthrodesis.
 - > 3 sizes.
 - > Symmetrical and bendable plate.
 - > Anatomical.
 - > Low profil design.
 - > Oblong hole with Surfix® fixation.
 - > Materials:
 - » Plate: Stainless steel 316L
Standard ISO 5832-1 & ASTM F138&139
 - » Screws and lock-screws: Titanium TA6V
Standard ISO 5832-3 & ASTM F136

Contra- indication: Complex distal radial fractures.

Modular Radial Head (MRH) and Carbon Modular Radial Head (CMRH) are intended for:

- Replacement of the radial head for degenerative or post-traumatic disabilities presenting pain, crepitation, and decreased motion at the radio-humeral and/or proximal radio-ulnar joint with joint destruction or subluxation visible on x-ray resistance to conservative treatment.
- Primary replacement after fracture of the radial head.
- Symptomatic sequelae after radial head resection.
- Revision following failed radial head arthroplasty.

RadFx system allows surgeons to have all the tools necessary to repair or replace a radial head fracture in one instrument set.

Pyrcarbon Radial Head Implants (CMRH)

Modular Radial Head (MRH) and Carbon Modular Radial Head (CMRH) are intended for:

- Replacement of the radial head for degenerative or post-traumatic disabilities presenting pain, crepitation, and decreased motion at the radio-humeral and/or proximal radio-ulnar joint with:
 - > joint destruction or subluxation visible on x-ray
 - > resistance to conservative treatment
- Primary replacement after fracture of the radial head.
- Symptomatic sequelae after radial head resection.
- Revision following failed radial head arthroplasty.

RadFx™ system allows surgeons to have all the tools necessary to repair or replace a radial head fracture in one instrument set.

It offers patients a radial head replacement.

The CMRH is an anatomically designed, semi-constrained, single-use, modular (hemi) radial head replacement. It has a proximal articular Pyrocarbon head component and a distal intramedullary Titanium stem component.

Design Specific Features:

- 3 different Pyrocarbon head sizes (20-22-24).
- 4 different stem lengths (10, 20, 30, 40) and these 4 sizes are available in both Standard or long collar size.
- 24 head/stem combinations possible.
- Anatomically curved, cement less, long stem option.
- Same Instrument set is used for both the CMRH as the MRH replacement.
- Colour coded broaches and trials.

Metal Radial Head

The Metal Radial Head (MRH) is an anatomically designed, semi-constrained, single-use, modular (hemi) radial head replacement. It has a proximal articular CoCr head component and a distal intramedullary titanium stem component.

- Sloping lateral surface is radial-ulnar notch and accommodates wrapping of annular ligament.
- Same instrument system is used for both the Pyrocarbon as the Metal proximal Radial Head replacement.

Katalyst™ Bipolar Radial Head system

KATALYST™ Bipolar Radial Head System is indicated in:

- Comminuted radial fracture with or without associated elbow instability.
- Comminuted radial fracture with associated rupture of the interosseous membrane; the Essex-Lopresti lesion.
- Post-traumatic arthritis involving the radiocapitellar or proximal radioulnar joint.
- Primary osteoarthritis involving the radiocapitellar joint or proximal radioulnar joint.
- Rheumatoid arthritis involving the radiocapitellar joint or proximal radioulnar joint.
- Revision of failed radial head prosthesis.

Titan™ Modular Total Shoulder System

Total Shoulder Arthroplasty or Hemiarthroplasty is indicated for:

- Severely painful and/or disabled joint resulting from osteoarthritis, traumatic arthritis or rheumatoid arthritis.
- Fracture-dislocations of the proximal humerus where the articular surface is severely comminuted, separated from its blood supply or where the surgeon's experience indicates that alternative methods of treatments are unsatisfactory.
- Other difficult clinical problems where shoulder arthrodesis or resection arthroplasty are not acceptable (e.g. - revision of a failed primary component).

Shoulder Hemiarthroplasty is also indicated for:

- Ununited humeral head fractures.
- Avascular necrosis of the humeral head.
- Rotator cuff arthroplasty.
- Deformity and/or limited motion.

The humeral component is intended for cemented or uncemented use. The glenoid component is intended for cemented use only.

PSH plate – Surfix[®] Proximal humeral plate

These plates are indicated for the fixation of proximal humeral fractures.

- 3 sizes.
- Symmetrical and bendable plates.
- Low profile design.
- Stabilisation of the lesser and greater tubercle.
- Materials:
 - > Plate: Stainless steel 316L
Standard ISO 5832-1 & ASTM F138&139
 - > Screws and lock-screws: Titanium TA6V
Standard ISO 5832-3 & ASTM F136

Indications

- The indications for surgery of the whole range of SURFIX[®] implants are described in the attached document Indications of these directions for use and in the leaflet.

Contraindications

- Acute infections; Absence of musculo-cutaneous covering; Bone deterioration preventing a good fixation of the screws in the bone.
