MicroFrance®

CASIANO TRANSCERVICAL LARYNGEAL
INJECTION MEDIALIZATION NEEDLE

Developed in conjunction with Roy R. Casiano, MD

Innovative Design for a Challenging Procedure

The Casiano Needle was designed specifically for the transcervical approach to vocal fold medialization. Its unique trocar design allows for penetration of the thyroid cartilage without clogging or breaking.

The blunt tip, 21.0 gauge needle, and ergonomic handle facilitate atraumatic palpation to reduce the risk of airway penetration. Additionally, the reusable needle design ensures consistent sharpness of the obturator and alleviates potential clogging of the outer needle cannula.

The MicroFrance® brand is a premier line of ENT instruments, designed with world-renowned ENT surgeons to facilitate new techniques and improve patient outcomes.
