DUNCAVAGE SPHENOID SINUS INSTRUMENT SET

Developed in conjunction with James A. Duncavage, MD

The Duncavage Sphenoid Sinus Set was developed to allow access to the interior of the sphenoid sinus. These instruments remove cysts and bone, as well as strip mucosa and palpate masses within the sphenoid sinus.

The MicroFrance® brand is a premier line of ENT instruments, designed with world-renowned ENT surgeons to facilitate new techniques and improve patient outcomes.

MicroFrance® Duncavage Sphenoid Sinus Instrument Set

Currently, surgeons who operate within the sphenoid to remove posterior cells are forced to invert frontal sinus instruments in order to access the floor of the sphenoid sinus. All of the Duncavage instruments have a 25° bend superiorly and a 25° bend inferiorly at the distal tips, allowing the surgeon to access the sphenoid sinus quickly and accurately. They also feature reverse-action handles that reduce the amount of movement at the distal tips when actuated.

Ordering Information

Product	Description	Quantity
MCEN150*	MicroFrance® Duncavage Sphenoid Sinus Set	1 set

Set Includes:

MCEN151	Sinus Vertical Cup Forceps	1
MCEN152	Sinus Horizontal Cup Forceps	1
